Details of Rate Increase

This rate increase is part of capital improvement plan to provide for \$204.5 million in capital projects required to rehabilitate, improve, and expand the sewage collection system and treatment facilities of the Authority.

At the existing rate, yearly net income along with current reserves and bond issue and loan proceeds will fund \$96.7 million of the capital projects. The remaining \$7.8 million in rehabilitation will be funded through increased rates.

The capital improvements fall into four major categories:

\$136.7 million to upgrade the treatment facilities to improve nutrient removal capabilities to remain in compliance with federal and state regulations, to expand the plant capacity to handle increased flow, and to replace equipment that has reached the end of its useful life;

\$35.7 million to upgrade existing pump stations and to add new facilities and equipment to handle increased flow and avoid back-ups and overflows, and to replace equipment that has reached the end of its useful life;

\$30.7 million to expand segments of several large interceptors to handle increased flow and avoid back-ups and overflows and to identify and remediate areas of deterioration of pipelines and manholes from decades of natural wear and tear;

\$1.4 million to upgrade information technology and replace vehicles and heavy machinery that has reached the end of its useful life.
